

Thank you for choosing us, we appreciate your decision to partner with VS-Shop for your scripting requirements. To facilitate a smooth panel installation on your server, kindly follow the provided steps. Please be advised: for optimal results, ensure your system has a fresh Operating System Installation to prevent any potential errors or overwrites.

Script Operation Steps:

- 0.1. Configure your setup in **config.json**.
1. Upload the server-utils.sh file to your VPS/Dedicated Server.
2. Grant execution permissions using the command: ***sudo chmod +x <path/to/your/server-utils.sh>***
3. Execute the script by running: ***./server-utils.sh***

Script Configuration Steps:

The config.json file needs the following information to be able to run successfully.

```
"logo_path": "logo is optional",  
"email_header": "Header for your Email",  
"recipient": "Send the email to",  
"email_from": "Email sent from"
```

To automatically execute the script at a specific time using cronjob, please follow the instructions below:

1. Access the server's terminal and run ***sudo crontab -e***.
2. Scroll to the end of the file, then insert the desired timing and script path. See step **#3** for an illustration.
3. Example: `*/* * * * * <path/to/your/server-utils.sh>` this example will run the script every 5 minutes.

Support:

For any assistance with the installations and/or any questions, please do not hesitate to contact us at support@justlovetoday.com, or at www.vs-shop.justlovetoday.com/#contact

We value your choice and anticipate the opportunity to support your hosting requirements effectively.
