

Thank you for choosing us, we appreciate your decision to partner with VS-Shop for your scripting requirements. To facilitate a smooth panel installation on your server, kindly follow the provided steps. Please be advised: for optimal results, ensure your system has a fresh Operating System Installation to prevent any potential errors or overwrites.

***This is a non-SSL version Installation.***

### ***Pterodactyl Panel Installation Steps:***

1. Upload the pterodactyl-panel-installer.sh file to your VPS/Dedicated Server.
2. Give the script executing permission with **chmod +x**  
**<path/to/your/Pterodactyl-Installer\_v1.0.0.sh>.**
3. Run the Script with **<./path/to/your/pterodactyl-installer\_v1.0.0.sh>.**
4. Make sure to **change database password**, as by default it sets it to “**yourPassword**”
5. Follow on-screen instructions to input your custom domain.
6. If the script ran successfully, you may proceed with the installation of Pterodactyl Wings Installer.

### ***Pterodactyl Wings Installation Steps:***

1. Upload the pterodactyl-wings-installer.sh file to your VPS/Dedicated Server.  
Install dos2unix by executing **sudo apt-get install dos2unix**
3. Convert the script from Unix to Linux based by executing **dos2unix**  
**<path/to/your/Pterodactyl-Wings-Installer\_v1.0.0.sh>.**
2. Run the Script with **<./path/to/your/Pterodactyl-Wings-Installer\_v1.0.0>.**
3. During the installation process, you will be prompted to configure the node's settings. Please

make sure to complete this step once the message appears.

### ***Support:***
