

Thank you for choosing VS-Shop! The PufferPanel Installer Script 2.0 simplifies the installation process by setting up the panel and its components with a single command. Please provide the requested information when prompted to ensure a smooth and successful installation.

This is an SSL version Installation.

PufferPanel Installer 2.0 Steps:

1. Upload the pufferpanel-installer.sh file to your VPS/Dedicated Server.
2. Install dos2unix by executing **sudo apt-get install dos2unix**
3. Convert the script from Unix to Linux based by executing **dos2unix <path/to/your/pufferpanel-installer.sh>**.
4. Give the script executing permission with **chmod +x <path/to/your/pterodactyl-panel-installer.sh>**.
5. Run the Script with **<path/to/your/pterodactyl-panel-installer.sh>**
6. Proceed with the installation and fill in the panel.example.com with your PufferPanel preferred panel URL.
